

To whom it may concern:

I'm writing you in regards to the Draft Title VI, I'm just answering the best way I know how, In Concern to this Site Pureity Oil in Malaga Ca. In the San Joaquin Valley. This Site was allowed to expose people to there toxic's. And this goes back to the 1970's when the State knew what was buried in those ground and did nothing to remove the Families in Tall Tree Trailer Courts that set next to this site, in fact right under there homes, it leaked in there yards and there children played on this Killing Field of Nuclear By Products with no knowledge that it would affect them for the rest of there lives. This Concerned me for this Mexican Family's that first set on this site in the 80's when they came in on this Super Fund and started to clean this mess, digging 1,800 truck loads of this Nuclear dirt By Products and exposing us all to there air borne Dust and those Families to this night mare and they knew nothing. They Knew

no English and were told nothing to  
the danger, to me it made no sense,  
When in the 80's the Engineer on this site  
Said to move these Families it was to  
dangerous for them, And they did  
nothing, knowing this Families were  
getting ill, And did nothing, and now  
its the year "2000" and now they have  
Indians on this site, I came to H.B.L.A.  
in "996" and Blew a whistle at them  
about this site, and how could they  
still have more Families Being exposed  
and they don't even know it, Again  
more Families who Can't Speak or  
ever Read For that matter in  
English and our town allowing it.

Fresno and they knew to cause  
there the ones who allowed P.G.E to  
Dump there Transformer ~~it~~ in there  
With no permits along with our town's  
leftover in there own Back yards and  
allowing everyone's Clogs to Buried there  
to, They now have a Water Injections  
Tower on this site to clean the tanks  
that sit under the store that sits  
on this site and it sells Food to  
this Poor Mexican and Indians on  
this site and this tanks are Volatary

3. This is not right, They have had some Fires out there that has Burned for days and was toxic fumes they had to Evacuate the whole town of Malaga until the Fire was out. This happened more than once, They have Alarms on the fence lines around the trailers for high toxic warning And somewhere on this Site they have a Incinerator Burning this stuff which I know its better not to transport this toxic around to other sites its to much exposure too others, But this Family's are exposed daily to it how can they let this happen to this Indians who can't even understand Spanish or English language is different it's in there back yards, and they didn't know it, Until a few year's ago when H. R. L. A. listen to my plead's and now have a promise to move them Trailers off this Site and relocate the Family's my writing to you is to ask you to watch that this happens, for the Family's in the 80's its to late most have moved or
